==

Program 1: Write a program that accepts two integers from user and prints addition & Subtraction of them.

{Note: checks for greater number to subtracts with while subtracting numbers}

Input: 10 20

Output:

 Addition is 20

 Subtraction is 10

Program 2: Write a program that accepts two integers from user and prints multiplication & Division of them.

{Note: checks for smaller divisor amongst entered number while computing division}

Input: 10 20

Output:

 Multiplication is 200

 Division is 2

Program 3: Write a program that accepts two integers from user and prints addition of their Cubes and subtraction of their Squares.

Input: 10 20

Output:

 Addition of 1000 & 8000 is 9000

 Subtraction of 100 & 400 is -300

Program 4: Write a Program to simulate simple calculator. Accept two integers from user and sign of operation to perform.

Input:

      Enter First Number: 10

      Enter Second Number: 20

      Enter the sign of Operation: +

Output: Addition of 10 & 20 is 30.

Program 5: Write a Program to print following Pattern.

Output:

```
*
*    *
*    *    *
*    *    *    *
```
